Part-II (Reading Skills) (10 Marks)

2. Read the passage given below and answer the questions that follow :

6×1=6

Health and hygiene go hand in hand. Health refers to a state of sound mind and a physically fit body free from any sort of sickness, disorder or ailment. Hygiene refers to the good practices that prevent disease and lead to good health through cleanliness, proper sewage disposal, balanced and nutritious food, regular exercise, proper sleep, pure and fresh air and supply of fresh drinking water. The proverb, 'Health is Wealth' is truly said of all things in the world. Health is the most valuable thing that one can possess. Money is, undoubtedly, a prized possession but can it provide pleasure to a ruined health? As body and mind are closely related, the mind can never be sound and cheerful without sound health. An unhealthy man may have intelligence, merit and wealth but he can never put them to use and reap their benefits. We must, therefore, adopt proper hygienic measures to preserve and maintain good health. Too much work or exercise, eating or drinking are injurious to health. A regulated life coupled with clear and pure mind makes life worth living.

(i) What does the term, 'health' refer to ?

(ii) Can a wealthy but unhealthy man enjoy life ?

Part-III (Writing Skills) (14 Marks)

4. Make a Précis of the following passage and give it a suitable heading : 5

Women, who constitute half of the human population, are encountered with many challenges. Female foeticide is, perhaps, one of the worst form of violence against the women, where a woman is denied her most basic and fundamental rights i.e. 'The Right to Life'. Though there is no particular definition of foeticide provided by the code of criminal procedure but the following definition will clear your concept. "Female foeticide" is the killing of a healthy female foetus in order to get rid of a female child by means of medical termination of Pregnancy (MTP) or Abortion. Female foeticide is considered a criminal offence in India. Abortion is lawful only when the doctor believes that the continuance of the pregnancy may pose a direct threat to the life or the health of the mother or the unborn child. No doubt, if this practice continues, it will disturb the social balance. For a healthy society, the male and female gender ratio must remain at a balanced level. The alarming rate of female foeticide is a cause of great concern, as the number of girls born is decreasing drastically in several sections of our society, thus, exposing females to more exploitation and violence. This state of affairs, if not corrected, will have a disastrous impact on the future generation of our society.
